Summary

Motivated and detail-oriented Computer Science student with strong expertise in **Java and backend development**, along with foundational knowledge in **Machine Learning**. Experienced in building applications and data-driven solutions using **Spring Boot, SQL, and ML frameworks** such as **Scikit-learn and TensorFlow**. Proficient in problem-solving, data analysis, and application development. Qualified in **TCS NQT – Digital Role**, demonstrating strong analytical and technical abilities.

Technical Skills

Programming Languages: Java (Primary), Python (Basic), JavaScript, HTML, CSS
Frameworks: Spring Boot
Machine Learning & Data Science: Scikit-learn, TensorFlow, Pandas, NumPy
Data Visualization: Matplotlib, Seaborn
Database: MySQL

Projects

URL Shortening Service

Designed and built a web-based application using **Java and Spring Boot** to convert long URLs into short, user-friendly links. Generated unique short code generation and designed **RESTful APIs** for URL redirection and management. Utilized **MySQL** for efficient storage and retrieval of URL mappings, along with basic analytics to monitor usage.

AI Resume Analyzer Web Application

Developed a full-stack web application using **React and Flask** to analyze resumes and generate scores with actionable suggestions. Enabled **PDF parsing and file upload functionality** to extract and evaluate resume content. Maintained user history using database integration and identified skill gaps to improve resume quality.

Personal Expense Tracker

Built an application using **Java and MySQL** to manage and analyze daily expenses. Applied CRUD operations to efficiently track income and expenses with categorized insights. Helped users monitor spending patterns and enhance financial planning.

Fake News Detection System

Created a machine learning model using **Python and Scikit-learn** to classify news articles as real or fake. Applied **TF-IDF vectorization** for feature extraction and trained models such as **Logistic Regression and Random Forest.** Improved prediction accuracy through effective preprocessing and text analysis.

Education

Bachelor of Engineering (B.E) in Computer Science and Engineering
University College of Engineering, BIT Campus, Tiruchirappalli
2022 – 2026

Higher Secondary Education
P.A.C.M Higher Secondary School, Rajapalayam

Certification

- **Machine Learning Using Python, Machine Learning for Beginners – Simplilearn**
- **Java Developer, Python Developer – Sololearn**
- **UI/UX Design – Great Learning, Prompt Engineering – Workshop**
